“Every day, our people work for a **safe, manageable and successful** implementation of complex CAPEX projects. From our point of view we understand the challenges you'll face as a client..

TACON has a dedicated team of professionals and are day and night available to make your project a success. People we are proud of and you can count on”.

Preface

Experience is the key for developing improvements in business processes, this exactly happened to Tacon. Preparation in stops and turnaround should be improved and tackled with a different kind of view. From this point of view Tacon developed their philosophical statement: "Thinking is good, but to think ahead is even better" and we still use our statement on daily bases.

During the launch of Tacon, we were only represented with the discipline of Mechanical Engineering but after several projects it was clear that the improvements in preparation and the methodologies could be realized in all other disciplines. With currently all disciplines represented within Tacon we are able to cooperate mutually and communicate between all of our disciplines, this trend still improves and has been strengthened ever since.

Tacon strongly believes that our next generation is the future and when tactically placed in our environment they are able to gain tremendous experience. Therefore Tacon combines young and experienced staff. Using this method we are able to train, educate and monitor our people. Our customers understand our methods due to our approach in offering appropriate people in the right combinations.

In recent years, we have experienced a strong growth in the Energy, Petrochemical, Pharmaceutical and Infra market and we have grown into a company with approximately 80 skilled employees with experience in a wide variety of projects and clients. Our people work very hard every day for the projects from our customers even at home and abroad. We will only be satisfied when our customers feel helped and the project resulted in a successful outcome.

Rene Kockelkorn
Algemeen Directeur

CONSTRUCTION

Starting with a manageable preparation, reliable engineering and scheduling, followed by an coordination of third parties (contractors), we achieve the best result for the fastest possible return on investment.

TURNAROUNDS

Using our own work methodology, the preparation and execution of complex turnarounds / shutdowns, combined with capital-intensive investment projects (CAPEX), will be handed over within budget and on schedule.

SAFETY SERVICES

Our safety management policy during turnaround, construction or relocation projects will be managed by selected staff and advanced monitoring, including site access control and registration.

ASSET INTEGRITY

Maintenance is an ongoing process, we increase the reliability and availability of your installation. Meet your maintenance plan still your expectations? TACON will work with you to improve and optimise your plan.

ASSET RELOCATION

Using our knowledge and experience, we are committed to a safe and manageable implementation of de-commissioning, disabling, transport to and re-commissioning at a new location, anywhere in the world.

SAFETY

INTEGRITY

RESPONSIBLE

OPEN, HONEST, TRANSPARENT

TACON TURNAROUND METHOD

The TACON Turnaround Method (TTM) has been developed to support a manageable preparation and execution of turnarounds. By the use of this methodology, projects will be executed consistent and efficient. From initiation phase until the close out of the project.

This methodology is generally applicable, and depending on the nature, the size and the complexity of a turnaround. Certain steps or activities may be adjusted, depending on the wished of the customer.

SAFETY, HEALTH & ENVIRONMENT MANAGEMENT

Preparing a safe and responsible execution of the work.

TURNAROUND MANAGEMENT

All the tasks and products needed to lead the turnaround project to a manageable and successful close-out.

PLANNING , PROCUREMENT & EXECUTION

Preparation of the scope, procurement of materials and services and implementation of scheduled activities.

QUALITY MANAGEMENT & LOGISTICS

Monitoring the quality and the availability of the necessary materials and services

COST MANAGEMENT & CONTROL

Budgeting, accounting and financial control of the entire project.

SCHEDULING & PROGRESS CONTROL

The overall schedule of the turnaround with the shortest possible turnaround time and a daily progress control during the execution.

REFERENCES

CONSTRUCTION

TACON was responsible for managing the engineering, procurement, preparation and construction (EPCM) of a data centre on a telecommunications company. TACON also led the expansion of a pharmaceutical plant.

TURNAROUNDS

A professional integral TACON team was responsible for the coordination of the execution and used the TACON Turnaround Methodology. The project included scheduling, planning, execution, HSE and logistics during the turnaround of an oil refinery and power plant.

SAFETY SERVICES

In addition of the preparation, execution and hand over of the greenfield power plant (1300 MW), was TACON also responsible for security assistance, gatekeeping and time registration.

ASSET INTEGRITY

In preparation for commissioning and start-up of the plant was TACON responsible to support and handover this project.

ASSET RELOCATION

During the relocation of a power plant (100 MW) from Utrecht to a non-European destination, was TACON responsible for the decommissioning, dismantling and transportation to the port of Rotterdam.
